

The Asurity® Promise

Tired of callbacks from water damage?

That's why we make it easy to protect your customers and your reputation with added protection on your condensate management install and coverage against water damage.

Receive 2 years of protection for water damage claims up to \$2,500 when you install an Asurity system following our guidelines.

And for unbeatable protection, choose our 4-year extended coverage when you add a 3-year maintenance agreement for protection from water damage claims up to \$2,500.

Register your Asurity products on the Asurity App for easy access to protection details for each install.

**ADDED PROTECTION
WHEN YOU REGISTER
YOUR INSTALL**

Up to \$2500

damage claims

Extended Coverage
with 3-year maintenance
agreement

Up to \$2500
coverage against water
damage claims

Qualifying Installations

Asurity® products are part of a complete system of condensate management solutions designed to work together. Proper installation, including the use of **redundant** components, is the best way to mitigate damages due to HVAC system failures.

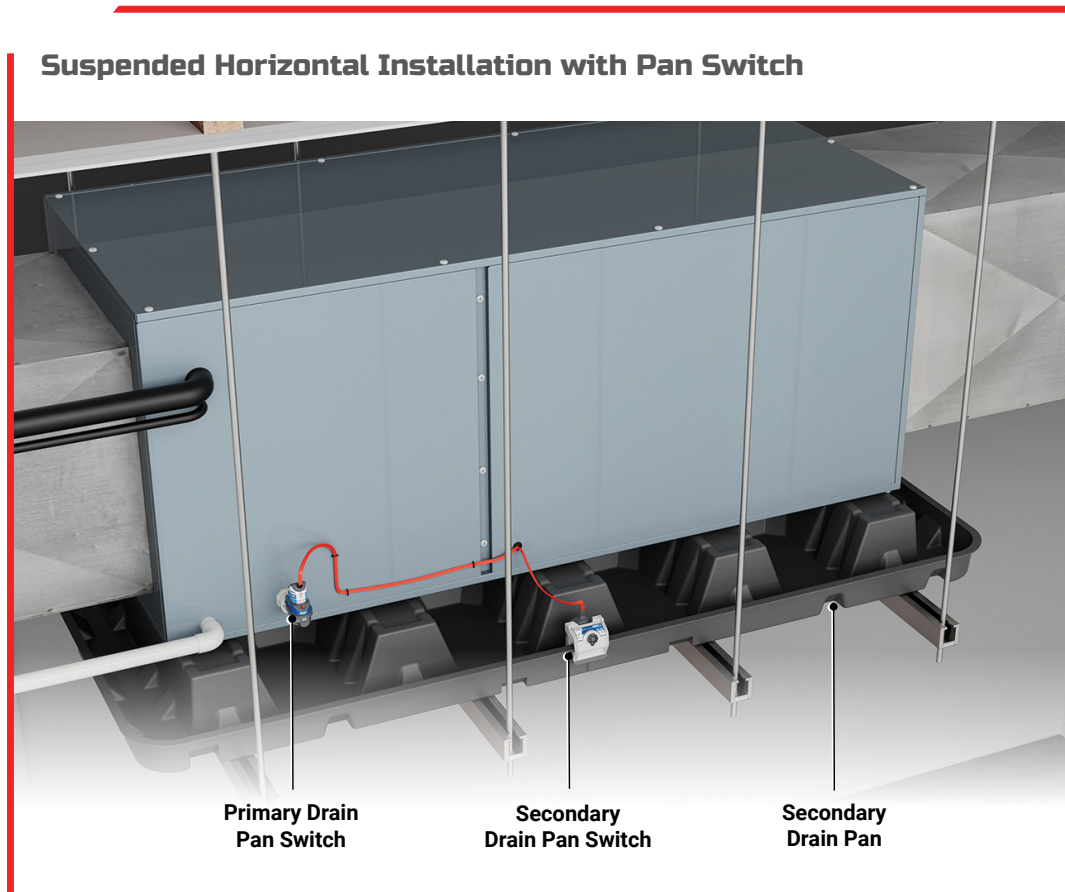

Installation Infographics

Installation infographics help you select the right condensate management system for a variety of applications, and ensure that your installation qualifies for the Asurity Promise coverage.

To view additional examples of qualified installations, possible product substitutions and other valuable resources visit asurityhvacr.com/promise.

We're here to make it easy to protect your installations, so you can focus on getting the job done right the first time.

Note: If you're not able to install an Asurity Drain Pan, you must install any Wet Switch® model in the secondary drain pan wired to the HVAC system to qualify for the Asurity Promise.

Download our easy-to-use App on the App Store or Google Play for quick registration.

Search **Asurity Promise** in the App Store & Google Play

1 Log in or create a new account

Enter the name of the contractor and contact information.

An email will be sent to verify the account and another to confirm your setup.

2 Detail your installation

Add the HVAC equipment to which the Asurity product is being installed.

Drop-down fields will assist you through the entry of the location and type.

Next, take a wide-angle picture of the HVAC equipment installed in its natural environment.

Now it's time to add your Asurity products to each of the HVAC equipment areas entered.

- Take a close-up picture of the product and use the *Add File* button to grab it from your photos.
- Use the *Add* button for additional products installed.

3 Enter the address

This field will auto-populate based on your phone's GPS location* and can be edited if needed. Use the Installation Reference field to add an invoice number, PO number, or other way to ID your project.

*Location services will need to be turned on when using the app for full functionality.

4 Our Promise

Standard coverage will automatically be selected. Your 2-year coverage will be assigned a reference number.

Select "Extended" from the drop-down to gain a 4-year coverage. This will require you to use the *Attach* button to share proof of your 3-year maintenance contract on the installation.

Hit register and an email will be sent to confirm the registration.

Frequently Asked Questions

Q: Is the Asurity® Promise only for new HVAC system installations?

A: The Asurity Promise is available for all installations that meet the installation requirements. Both new installations or full/complete retrofits qualify if all requirements are met. For all installations, new condensate management products must be installed or replaced. No already-installed condensate management products will qualify for the Asurity Promise.

Q: Is the Asurity Promise available for contractors that install residential multi-family projects?

A: Yes, the Asurity Promise may be offered for those installations if all system requirements are met.

Q: Can you use other brand products for part of the installation and still qualify for the Asurity Promise?

A: Only DiversiTech® or Asurity brand products may be installed as part of the Condensate Management system for the installation to qualify for the Asurity Promise. No competitive products. A non-Asurity drain pan may be used but must have an Asurity Wet Switch installed in the secondary drain pan wired to the HVAC system.
